addition to the overarching course outcome mentioned earlier, a Bachelor of Science

program aims to provide students with the following specific learning outcomes:

- 1. Mastery of Core Concepts: Graduates will have a deep understanding of the core concepts and theories within their chosen field of study, enabling them to comprehend and analyze complex scientific phenomena.
- 2. Research and Inquiry Skills: Students will develop the ability to formulate research questions, design experiments, gather data, and draw meaningful conclusions. They will be adept at applying various research methodologies and techniques.
- 3. Critical Thinking and Problem Solving: Graduates will demonstrate the capacity to critically evaluate information, analyse problems, and develop innovative solutions using logical reasoning and evidence-based approaches.
- 4. Quantitative and Analytical Skills: Students will be proficient in utilising quantitative methods and analytical tools to interpret data, perform statistical analyses, and make informed interpretations.
- 5. Effective Communication: Graduates will possess strong communication skills, both written and oral, allowing them to convey complex scientific ideas to both technical and non-technical audiences with clarity and precision.
- 6. Collaboration and Teamwork: Students will be able to work effectively in interdisciplinary teams, recognizing the value of diverse perspectives and contributing collaboratively to scientific projects and initiatives.
- 7. Technological Proficiency: Graduates will be comfortable using relevant technologies and software tools within their field, enabling them to adapt to evolving technological advancements.
- 8. Ethical and Social Responsibility: Students will understand the ethical implications of scientific research and its applications. They will demonstrate awareness of the social and environmental impact of their work and make informed decisions accordingly.
- 9. Continuous Learning: Graduates will embrace a lifelong learning mindset, recognizing the need to stay updated with emerging trends, new discoveries, and evolving methodologies in their field.
- 10. Career Readiness: Students will be well-prepared for entry-level positions in their chosen field, equipped with the skills and knowledge needed to succeed in a professional environment or pursue advanced studies.

11. Application of Knowledge: Graduates will be capable of applying theoretical knowledge to real-world situations, addressing practical challenges and contributing to the advancement of scientific knowledge through innovative applications.

These outcomes collectively ensure that students who complete a Bachelor of Science program are not only academically prepared but also equipped with the skills and qualities necessary to excel as professionals and contribute positively to their field of expertise.

Bachelor of Arts (B.A.)

Upon successful completion of the Bachelor of Arts program, students will have developed a well-rounded education encompassing a broad range of disciplines within the arts and humanities. Graduates will exhibit a nuanced understanding of cultural, historical, and societal contexts, along with the ability to think critically, communicate effectively, and engage in creative and analytical endeavors. They will be prepared for diverse career paths, further academic pursuits, and will contribute meaningfully to the cultural and intellectual landscape of society. In addition to the overarching course outcome mentioned earlier, a Bachelor of Arts program aims to provide students with the following specific learning outcomes:

1. Interdisciplinary Knowledge: Graduates will possess a comprehensive understanding of various disciplines within the arts and humanities, allowing them to appreciate the interconnectedness of ideas, cultures, and historical contexts.

2. Critical Thinking and Analysis: Students will develop the ability to critically analyze information, texts, and artistic works, and to formulate well-reasoned arguments and interpretations based on evidence.

3. Effective Communication: Graduates will be adept at expressing complex ideas and insights through clear and persuasive written and oral communication, tailored to different audiences and purposes.

Available:-

4. Cultural Awareness: Students will gain a deep appreciation for diverse cultures, perspectives, and traditions, fostering empathy and cross-cultural understanding.

5. Creative Expression: Graduates will have the opportunity to explore and nurture their creative abilities, whether through artistic endeavors, literary pursuits, or other creative forms of expression.

6. Research Skills: Students will learn how to conduct effective research, evaluate sources, and synthesize information to contribute to academic discourse and creative projects.

7. Ethical and Social Awareness: Graduates will be equipped to consider ethical implications, societal impacts, and historical contexts when engaging with cultural artifacts, texts, and artistic creations.

8. Adaptability and Problem Solving: Students will develop the ability to adapt to changing circumstances, think critically in complex situations, and find innovative solutions to challenges.

9. Global and Historical Perspective: Graduates will possess a broader understanding of global issues and historical developments, enabling them to connect contemporary events to their historical roots.

10. Lifelong Learning: Students will cultivate a lifelong learning mindset, recognizing the importance of continued intellectual growth and the pursuit of knowledge beyond graduation.

11. Collaboration and Teamwork: Graduates will have experience working collaboratively on projects, respecting diverse viewpoints and contributing constructively to group efforts.

12. Career Readiness: Students will be well-prepared for a variety of career paths that value strong communication, critical thinking, and cultural understanding, such as writing, publishing, education, media, public relations, and more.

Bachelor of Education (B.Ed.)

Upon successful completion of the B.Ed program, students will demonstrate a comprehensive understanding of educational theories, pedagogical techniques, and classroom

management strategies. They will be equipped with the skills to design effective lesson plans, create inclusive learning environments, and employ various assessment methods to cater to diverse student needs. Graduates will exhibit the ability to critically analyze educational issues, adapt teaching methods to evolving trends, and contribute positively to the educational landscape In addition to the previous course outcome, upon completing the B.Ed program, students will also be able to:

1. Integrate technology into teaching practices to enhance student engagement and learning outcomes.

2. Apply psychological principles to address the socio-emotional needs of students and foster a supportive classroom atmosphere.

3. Collaborate with colleagues, parents, and other stakeholders to create a holistic educational experience for students.

4. Design and implement differentiated instruction to accommodate diverse learning styles and abilities.

5. Evaluate educational research and incorporate evidence-based practices into their teaching methodologies.

6. Demonstrate proficiency in classroom management techniques that promote positive behavior and effective learning.

7. Critically assess and adapt curriculum materials to align with educational standards and societal changes.

8. Develop reflective teaching practices to continuously improve their instructional methods and student outcomes.
